PEO - GCSS

A View of Munitions, the Industrial Base and the TRIAD Process

12 January 2000

Presented to:

2000 Ammunition Executive Summit

Presented by

MG JOHN F. MICHITSCH

Program Executive Officer
Ground Combat and Support Systems

The Need for Change! Army Relevancy

CSA Vision:

Lighter and Faster, More Deployable, Lethal and Survivable

MEDIUM FORCE - 2 Medium Weight Brigades @ Ft. Lewis "Force Multipliers and Readiness thru Technology & Training"

Information Dominance thru Digitization, Smart Munitions, Light, Fast & Lethal Platforms

- > JLW 155, LW Crusader, Wheeled and Tracked RSV concepts
- > Future Combat Vehicle (FCV) "System of Systems"
- > Greater Need for Smart Munitions Smaller Calibers

The Drivers of Change "Smart Munitions"

- TRADOC User Community Artillery School Vision
 - "Munitions Centrality" Force Multiplier Effect from the Munitions
 - Legal Mix IX Where future technology is moving
- AMC and TRADOC Precision Munitions Logistics Study (PMLS)
 - Warfighting Benefits
 - Logistics Benefits
 - LC Cost Benefits
- **TRIAD Process Artillery IPT "JDAM-like evolution"**
- Medium Brigade Needs More lethal, Less Log Tail

Evolving Strategy "Transition to Smart"

- Make Legacy Stocks Smarter "JDAM-like"
 Auto Registration
 1 D (Range) and 2 D (Range and Deflection) Correction
- SADARM Technology Evolution

Basic — → Product Improved → → Block II

Extended Range Precision Attack - XM982

DPICM → SADARM → Unitary → Special Effects

Medium Force "Driving Change"

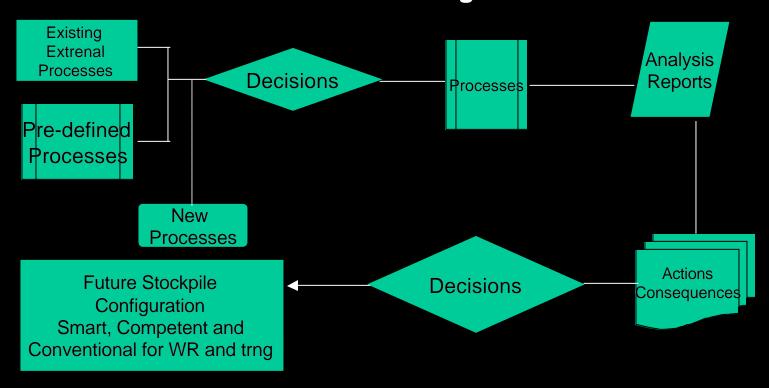

- Lighter, Faster, More Deployable, Lethal and Survivable:
 - Vehicles and Weapons Lighter, Reduced Caliber,
 C130 Deployable for Intra-theater transport
 - Munitions must be lighter and must have a reduced Logistical Footprint
- "Smart Munitions"
 - Reduces tonnage and cube requirements
 - Increases stowed kills
 - Increased first round kill probability
 - Reduced, to possibly No target registration req'd
 - Greater Standoff potential enhanced Overmatch
 - Non-line of Sight (NLOS) Increased Survivability
 - Fire and Move, Fire on the Move Inc'd Survivability

How Do We Get There?

"One Approach - Business Model Analysis"

■ The PEO with TACOM Building a Business Model

Coordinate processes with all stakeholders

Business Model Approach

"Transition to Smart"

- Identify Processes which can yield Reinvestment Potential
 - Greater use of M&S in Training
 - Reduce Industrial Base Under-Utilized Capacity
 - Consolidate the Organic Base "Right-Size"
 - Improve processes and reduce the costs to manufacture
 - **▶** Focus tech base and incorporate new MANTECH strategies
 - Challenge the Requirements Processes Smarter,
 Creative Solutions for Replenishment
 - Ammunition Management -
 - Reduce the Fragmentation
 - Single Strong Voice
 - Manage as a Major/ACAT 1 Program
- Develop sound technological and programmatic solutions
- Market to the Army Leadership for Implementation

Business Model Approach

- Can we increase the Ammo Budget? Do we have a Case to argue for it?
- Do we Reinvest Savings from other other processes evaluated? Training and Industrial Base!
- TRIAD and SAG sponsored Elevate Results as Req'd
- TEC and Integration Team develop/manage process
- TRIAD Family Teams pull it all together assuring all stakeholders are in the process IPPD
- Change is: "Responsive to the Customer"
 - "Customer Requirements Driven"
 - Life Cycle Focused
 - Complete Ammo Community participation
 - TRIAD process enables Industry perspective

TRIAD Assessment

- Communications have drastically improved! Approaching "true" IPPD Environment"
- Process uncovered many Issues
- The Teams and TEC have solved the easy Issues
- Tough Issues have been tabled, but unresolved
- Need the SAG to bring forward the toughest Issues with a plan for resolution.
- PNNL and GAO Investigations/Recommendations -Need a Single Voice - Manage as a Major Program
- TRIAD is a good, workable interim solution
